

## Melissa Pemberton

### Airshow Pilot and Display Skydiver

Melissa Pemberton at 25, is an experienced aerobatic and competition pilot.

Melissa grew up flying basic aerobatics in Pennsylvania with her grandma in a Cessna 150 Aerobat. In 2006 at the tender age of 22 she became the youngest female ever to ever make the U.S. Unlimited Aerobatic Team.

With six airshow seasons under her wings, Melissa has been turning heads all over the globe. She has been flying aerobatics since she was 17 and competing since she was 19.

While competing at the World level of aerobatics including the recent World Championships in England, Melissa maintains a full time airshow circuit. This year she will take her show throughout the world including such places as North America, Japan, Hungary, Spain and El Salvador!

Melissa's airshow routine is a high energy and action packed display of Unlimited Aerobatics. The show combines gyroscopic tumbles, torque rolls and low level aerobatics that amazes spectators worldwide. With smoke on, her candy Blue Edge 540 with pink flames soars through the skies!

Melissa is also a professional skydiver and is part of the world's only all-women four-way VRW (Vertical Relative Work or free-fly) skydiving team, which competed at a professional level. She uses these unique skills to perform wing-suit skydiving displays and 1,000 square foot flag skydives.

This year is the 100<sup>th</sup> year anniversary of women in aviation and Melissa would like everyone to put in the extra effort to bring as many women and young girls to the shows in order to show them that no dream is too large and that nothing is impossible!
